

# Health and Population Fellowship Cell

## The objectives of the cell are to:

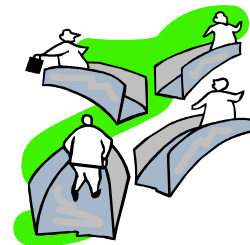

- Act as a storehouse of information regarding available international and national scholarships/fellowships, calls for proposals, training programs workshops & report/researches, vacant posts/ jobs etc.
- Encourage members to participate by providing per need available technical support

## Activities

H&PFC collects information include the following:

- Scholarships /Fellowships
- Call for research proposal/papers
- Call for projects
- Trainings/workshops/courses
- Vacancies/jobs
- Conferences/meetings
- Upcoming events/updates
- Reports etc.

Organize the collected information and disseminate, in a timely manner, the collected information amongst its members

## Results/outcomes

All the members get latest information from HPFC's News Sheet.

## Indicators

HPFC has more than 25 members from different organizations

Centre for Health Population Studies (CHPS)

# MASTER IN PUBLIC HEALTH (MPH)

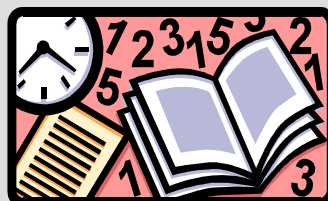

## **MPH Programme**

The Master of Public Health (MPH), a one-year degree program at CHPS is being run through Al-Khair University affiliation. Al Khair is the 3<sup>rd</sup> oldest private university of Pakistan and recognized by the Higher Education Commission (HEC). The MPH program is being conducted on a semester system.

## **SCOPE**

MPH enables candidates to be placed in different development agencies of the world i.e nationally and internationally. MPH degree holders can hope to be placed in NGOs, Local Health Depts., Population Depts., and Donor Agencies etc.

## **ADMISSION ELIGIBILITY**

MPH is for a variety of development workers (please see the list below) and not just for medical doctors or people belonging to the medical profession. The candidates are selected on merit as determined by candidates' previous academic standings. Basic requirement for admission to MPH programme is that the candidate has obtained.

- a) MBBS/BDS degree or its equivalent from a recognized university.
- OR**
- b) Master's degree in nursing, social sciences, life sciences and humanities from a recognized university. These include the subjects of Biochemistry, Microbiology, Botany, Zoology, Physiology, Anatomy, Chemistry, Physics, Pharmacy, Psychology, Sociology, Home Economics, Social Work, Nutrition, Business Administration, Computer Science and Public Administration.
